(a) prior side: Iter-DC ≥ FillFirst at 4/6
PSNR (dB) of the prior volume
P0 bilinear
P1 Wiener (frozen)
P4 Iter-DC
P2 FillFirst-Wiener
(b) network side: FillFirst is best at 5/6
PSNR (dB) of the network output
Bilinear prior
Iter-DC prior
FillFirst-Wiener + gated fusion
(c) the two rankings disagree
Δ PSNR (dB)
prior: IterDC − FillFirst
network: IterDC − FillFirst
